DETAILED ACTION

1. Amendment filed on 9/29/06 has been received.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 15-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claim 15 recites the limitation "said refrigerator housing" in line 5 of the claim.

There is insufficient antecedent basis for this limitation in the claim.

It is unclear if claim 15 requires a refrigerator or not. For purposes of advancing prosecution, the examiner has assumed that claim 15 and its dependents require a refrigerator.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3683

6. Claims 1-5,7,8,12-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Elson (U. S. Patent no. 5,277,544) in view of Andrione et al (U. S. Patent no. 4,549,859).

Elson discloses :

See figures hermetic compressor 30, housing 33, oscillation mass 16, spring elements 36 one set which is disclosed as being hard and one set which is disclosed as being soft (see column 4 line 35- column 5 line 2).

Elson also disclosed that the compressors can be used in a refrigeration system, see column 1 lines 13-18. Elson does not specifically state the system can be used in a refrigerator.

Andrione et al teaches the use of hermetic compressor 2 mounted with spring elements 10 to reduce vibration in a refrigerator.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the hermetic compressor system of Elson in a refrigerator as taught by Andrione et al as it is a known use of such compressors and reduces vibrations and accompanying noise which leads to commercially appealing product (quieter refrigerators sell for a premium compared to noise units) as well as more durable (less vibration prevents the refrigerant lines from becoming damaged and leaking).

Response to Arguments

7. Applicant's arguments with respect to claims 1-5, 7,8,12-14 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3683

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

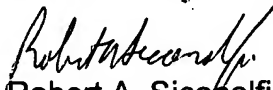

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
